

GEORGE FREDRICK

Lagos, Nigeria | +234 913 918 6815 | georgefredrick345@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CAREER SUMMARY

Cybersecurity professional with hands-on experience in offensive security, network traffic analysis, and Python automation. Skilled in penetration testing, vulnerability assessments, and technical reporting using tools such as Kali Linux, Wireshark, and Burp Suite. Track record of building custom security tooling and conducting simulated attacks and root-cause breach analysis to strengthen client defenses. Currently completing NYSC while continuing to build offensive security expertise.

TECHNICAL SKILLS

Penetration Testing & Exploitation: Nmap, Metasploit, Burp Suite, sqlmap, Hashcat, John the Ripper, Manual & Automated Vulnerability Assessment, OWASP Top 10

Vulnerability & Web Scanning: Nessus, OpenVAS, Nikto, OWASP ZAP

Network & Traffic Analysis: Wireshark, Packet Sniffing, Network Proxy Development, MITM, Evil Twin, DoS Simulation, MAC Spoofing

Digital Forensics & OSINT: Autopsy, OSINT Frameworks, Google Dorking, Metadata & Artifact Analysis

SIEM & Monitoring: Splunk, ELK/Wazuh, Log Analysis, Incident Response

Cloud & Infrastructure Security: AWS, Azure, IoT/Medical Device Security

Systems & Platforms: Kali Linux, Linux Administration, VirtualBox, Windows

Programming & Scripting: Python (automation & custom security tooling), Bash, Git

Soft Skills: Technical Report Writing, Root Cause Analysis, Analytical Thinking, Prioritization, Professionalism

PROFESSIONAL EXPERIENCE

National Youth Service Corps (NYSC) — Corps Member

Nigeria | Current

- Fulfilling Nigeria's mandatory one-year national service requirement while continuing hands-on cybersecurity work and certification preparation.

Wabot — Remote Security Auditor

Mid-2025

- Engaged by a company experiencing service downtime following a security breach to conduct a full penetration test and lead root cause analysis to determine the breach vector.
- Leveraged Python to develop and optimize automated bots, ensuring secure API integrations and data handling.
- Performed stress testing and security audits on automation scripts to identify and close exploitation paths, and monitored bot activity logs for anomalies to improve incident response for service disruptions.

Selah Tech LLC — Cybersecurity Trainee

Jan 2025 – Present

- Engineered Python automation tools for network scans, socket listening, and data exports.
- Developed a network proxy and sniffer for analyzing, manipulating, and reconstructing traffic to support security assessments.
- Conducted wireless packet captures and simulated attacks including MITM, Evil Twin, DoS, and MAC spoofing.
- Analyzed malware samples and devised detection rules to help streamline incident response.
- Performed exploitation techniques and web application attacks (XSS, SQLi, brute force) to uncover vulnerabilities.

Nexapay — Remote Security Analyst / Penetration Tester

2025

- Engaged by a payment platform to penetration test their security architecture, including the landing page, APIs, and website, to catch vulnerabilities and loopholes before deployment.
- Analyzed transaction patterns to help identify potential fraud or unauthorized access, and supported implementation of security protocols to protect sensitive financial data.
- Conducted risk assessments to identify vulnerabilities in payment processing interfaces.

Cyber Secured India — Remote Cybersecurity Intern

Apr 2025 – Jul 2025

- Conducted forensic analysis and participated in case-based simulations reflecting real-world cybercrime scenarios.
- Used Kali Linux, Autopsy, Wireshark, and OSINT frameworks for investigative reporting.
- Delivered weekly technical reports, quizzes, and live challenge responses documenting security findings.

EDUCATION

B.A., International Relations & History — Adekunle Ajasin University, Ondo | 2019 – 2024

Cybersecurity Training — Selah Tech Academy, Akure | 2025

CERTIFICATIONS

- Ethical Hacker — Cisco Networking Academy | 2023
- OPSWAT Academy Certification | Apr 2023
- Cisco Networking Basics | Jan 2023
- Selah Tech Academy Certification | Mar 2023
